IDS
Integrated
Digital Systems

January 31, 2025

To Whom It May Concern,

I am pleased to recommend Hasan Kourani, who recently completed the Full Stack Web Development Internship program at Integrated Digital Systems - IDS from December 5, 2024, to January 31, 2025. Throughout this period, Hasan Kourani demonstrated exceptional technical proficiency and a strong work ethic.

Hasan Kourani gained hands-on experience with core web development technologies including HTML, CSS, JavaScript, C# (ASP.NET Core), PHP, and SQL for database management. He worked with frontend frameworks like React.js and Vue.js, and backend frameworks including ASP.NET Core and Laravel. Additionally, Hasan Kourani became proficient in version control with Git, database systems like SQL Server, MySQL, and PostgreSQL, and development tools such as Visual Studio and Visual Studio Code.

Hasan Kourani showed a strong understanding of responsive and mobile-first design principles, MVC architecture, and API development with RESTful APIs. He also embraced security best practices, unit testing, debugging techniques, and participated actively in code reviews and collaborative development practices. Hasan Kourani further demonstrated expertise in performance optimization and SEO principles.

In conclusion, I have full confidence in Hasan Kourani's abilities and recommend him for any future web development position. He will undoubtedly be a valuable asset to any team.

Please feel free to contact me if you need further information.

Sincerely,

Suha Mneimneh
Team Leader
