TRAINING CERTIFICATE

To Whom It May Concern,

This is to certify that *Mr. Hasan Kourani* has successfully completed his training programme at IDS for two months (From 05th December, 2024 to 31th January 2025) which equals 240 hours in the Development and Research Department.

During the period of his internship programme with us he was found punctual, hardworking and inquisitive.

Throughout the above stated period, Mr. Hasan was introduced to the following:

- Core technologies including HTML, CSS, and JavaScript for frontend development, C# (ASP.NET Core) and PHP for backend programming, and SQL for database management
- Frontend frameworks such as React.js and Vue.js, as well as backend frameworks including ASP.NET Core and Laravel.
- Version control tools like Git and GitHub, database systems including SQL Server, MySQL, and PostgreSQL, development tools such as Visual Studio and Visual Studio Code, and debugging tools like Browser DevTools and Postman
- Responsive and mobile-first design principles, the MVC (Model-View-Controller) architecture, API development and integration with RESTful APIs, and security best practices for web applications.
- Unit testing and debugging techniques, code review processes and collaborative development practices, as well as basic SEO principles and performance optimization strategies

This certification is being issued upon his request.
